## SAVE ON THE MOST EFFECTIVE LASER FOR SUN DAMAGE AND SKIN PIGMENTATION THROUGH MARCH

Both our female and male patients can benefit from a pre-summer Spring Fraxel treatment to counteract last summer's sun damage and possible pre-cancerous conditions. Plus, it brings the complexion to a fresh even palette just in time for a new summer season. Don't wait until the summer, when you are back in the sun. **Dr. Sobel**, himself does this treatment every year before heading back into the warmer weather.

**FRAXEL LASER TREATMENT** targets aging and sun-damaged skin with microscopic laser columns that penetrate deep into your skin to expedite the rebuilding of collagen and evening out the skin tone of the face, neck, chest, and hands. It is also very effective for acne scars. Most patients see dramatic, visible results after one treatment!

Save \$700\* on a single area (\$1,800 — normally \$2,500)

\*Offer valid through March 31, 2023 and cannot be combined with any other discount offers.
